**weather will push everything back a day as necessary*

Dear City of Fincastle Residents,

We're excited to begin our sealcoating project to preserve and protect your neighborhood streets. To minimize disruption to your daily routines, we've carefully planned this work in three phases over three days, ensuring that at least one side of each road remains open for traffic throughout the vast majority of the project. This phased approach allows residents to maintain access to their homes and businesses while we apply this important protective treatment that will extend the life of your pavement and enhance the appearance of your neighborhood streets.

Thank you for this opportunity!

Kevin Gray

President
